Connected, Actionable Data and True Prime Suite Integration

Greenway Care Coordination Services leverage the fully integrated solution, RevUp, to allow practices to enroll and monitor patients in remote care programs. Built-in Prime Suite workflows make **maximizing your care coordination strategy easy**.
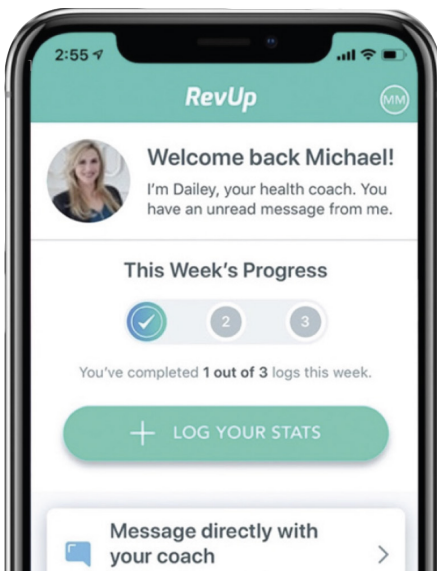

AREAS OF FOCUS

- ✓ **Bidirectional Enrollment by Services**
- ✓ **Exchange of Health History**
- ✓ **Integrated Discrete Vitals**
- ✓ **Escalation Tasks**
- ✓ **Compliance Documentation/Integrated Care Summary**
- ✓ **Automated Claim Generation**

Prime Suite users have access to the uniquely comprehensive features of RevUp's remote care programs:

- Telephonic patient enrollment
- Dedicated team of health coaches
- Cellular connected devices with real time vitals data
- Automatic claims creation

RevUp allows programs to get off the ground seamlessly with faster reimbursements – all while living in the Prime Suite environment.

> "We're proud to offer our ambulatory care providers a solution that is integrated within their existing EHR, making it easier than ever to provide early intervention to critical patients, thus further reducing hospitalizations and closing gaps in care."
>
> **– David Cohen, Chief Product and Technology Officer, Greenway Health**

INTEGRATED ORDERING AND ENROLLMENT

Through the fully-integrated RevUp platform, qualified Medicare patients are enrolled for the practice, prompted by enrollment flags and trigger ordering by service. Practices can see enrollment status real-time in the existing clinical workflow, and patients begin receiving CCM and RPM services in less than 5 days.

INTEGRATED VITALS, DOCUMENTS AND CLAIMS

RevUp is the only care management app integrated with Prime Suite providing automated claims creation via the RevUp billing engine, eliminating the manual claim creation step for each patient, every month.
